

# Ring Sarasota

## Ring Sarasota COVID protocols

All ringers come to each rehearsal with clean gloves and mask and wash hands prior to entering rehearsal room.

Masks are to be at least double layer per CDC guidelines.

Unless in 'concert mode' all ringers are socially distanced in the rehearsal room.

Bell handles are wiped down with disinfectant wipes each time personnel move to different positions.

All equipment is wiped down before storing after rehearsal.

If members are not feeling well, they stay home.

Any snacks provided for break time are individually packaged and picked up upon entering rehearsal space.

Rehearsal space and adjoining space air conditioners are running before and during rehearsal to maximize air flow and circulation.

Cases have been spread out around the room to avoid crowding and promote social distancing.
